

WHAT IS ASHA CERTIFICATION?

The ASHA Certificate of Clinical Competence (CCC) is a nationally recognized professional credential in the fields of Audiology (CCC-A) and Speech-Language Pathology (CCC-SLP).

WHAT DOES IT TAKE TO BE ASHA-CERTIFIED?

GRADUATE DEGREE

from an accredited program

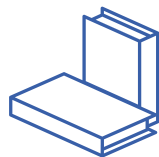

1,600+ HOURS

of supervised clinical experience

PASSING SCORE

on national examination

30 HOURS

of continuing education every three years

Only those who complete a rigorous academic program, pass a national examination and engage in continuing education can be ASHA-certified.

WHY DOES IT MATTER?

7.7% of American children have a voice, language or swallowing disorder

7.5M Americans have trouble using their voices

60% of veterans returning from Iraq and Afghanistan have hearing loss

50M Americans experience hearing loss

The ability to communicate effectively is vital. ASHA-Certified Professionals are extensively trained to identify speech, language and hearing issues at the early stages, help prevent them in certain patients and treat them in others — these professionals are dedicated to improving lives.

WHY HIRE AN ASHA-CERTIFIED PROFESSIONAL?

Backed by 60 years of accumulated knowledge and clinical expertise, those who earn this credential meet the highest standards of excellence in their professions.
